NEQMAP aims to improve the quality of learning in the Asia-Pacific by enhancing the use of student learning assessment to strengthen education systems.

www.unescobkk.org/education/neqmap
In recognition of growing interest in the Asia-Pacific region in sharing and exchanging experiences and best practices around the theme of monitoring of educational quality, UNESCO’s Asia-Pacific Regional Bureau for Education (UNESCO Bangkok) established **NEQMAP** on 28 March 2013 in Bangkok, Thailand.

The diagram below shows our theory of change - that if countries/jurisdictions of the region are able to **regularly share and exchange experiences and best practices**, if analytical work is undertaken around areas of concern in order to **produce knowledge to inform policy**, and if the capacity of institutions and systems to **better monitor learning** is built as needed, learning would be improved in education systems.
The network provides a platform for exchanging of expertise, experiences and lessons to improve the quality of learning in Asia-Pacific.

Modalities:
- Knowledge sharing
- Research
- Capacity building

Focus:
The network will focus on assessment as the key tool for monitoring learning, while acknowledging the importance of maintaining strong linkages with other enablers of learning in the classroom including curriculum and pedagogy.
Institutional Membership to the network is open to all institutions/organizations/associations, based on the following criteria:

- Mandate of the institution/organization/association strongly linked to quality of education
- Track record of activities linked to quality of education
- Approval by a simple majority of the Steering Group

Individual membership is also available. Contact us for more information!
